

Enzyme prolyl oligopeptidase

Systematic name /
IUBMB nomenclature Prolyl oligopeptidase
CAS number 72162-84-6
IUBMB number EC 3.4.21.26
EC number None
Synonyms

- Post-proline cleaving enzyme, Proline endopeptidase, post-proline endopeptidase, proline specific endopeptidase

Properties Prolyl oligopeptidases catalyse the hydrolysis of peptide bonds at the C-terminal side of proline residues, and to a lesser extent of alanine residues, of peptides and proteins, releasing peptides and amino acids. The
